

JCKitchens

Kitchen Design & Installation, Sudbury, Suffolk

JCKitchens

Who we are

Based in Sudbury, Suffolk, JCK is a family-run kitchen design and installation business with over 15 years of experience. Working from our workshop and sample room, the JCK team is committed to delivering exceptional quality and stylish kitchens, designed not only to enhance a home, but to reflect the individual tastes of your prospective homeowners.

Dedicated designer and single point of contact to manage each project, from planning to installation.

Two on-site delivery drivers providing an efficient delivery service, with flexibility for any rescheduling requirements at short notice.

Two year maintenance period and after care plan for all projects from completion date.

Strong relationships with all suppliers, enabling quick issue resolution and turnaround when required.

In-house workshop enabling a bespoke design and assembly approach, plus stock storage solution.

Why JCKitchens

The kitchen is the heart of any home. It's where moments are baked into memories, family traditions and recipes are passed along generations, and conversations, big and small, happen over cups of tea. That's why at JCK we believe that the attention that has gone into building a home should be reflected in the care, detail and design poured into the creation of the kitchen.

Reliability

At JCK we offer high **quality** contract kitchens for developers and house builders. Component parts are **individually** ordered and assembled in our warehouse, enabling us to offer **flexibility** with product and design to meet your customers' specific needs and tastes.

From classic to contemporary, traditional to twenty-first century, we can offer a wide variety of styles, for large sites of over 50 plots, down to individual builds.

We are equipped to adapt to the unique challenges that developers often face, and we understand how building schedules can change at short notice, and products can suddenly be in short supply.

Our agile ways of working, in-house workshop and stock storage, long-term supplier relationships, and skilled and experienced team, mean that you can always **rely** on us to deliver.

How we work

At JCK we understand that there is no such thing as a 'one size fits all' solution to creating the perfect kitchen. Using architects plans we will work with you to design a master plan to be offered to your future homeowners.

Your customers can then choose their preferred cabinet door and handle style, alongside many other bespoke upgrade options – sink style, taps, space towers, appliances – allowing them to personalise and create their dream kitchen.

A simple 6 stage process underpins how we will work with you:

1

Visit:

Come to our workshop in Sudbury, view our sample room, and discuss your kitchen specifications with our expert designers.

4

Call off:

We will conduct a check measure and order the kitchen based on an agreed delivery date.

2

Design:

Provide us with your architect plans and we'll put together a design pack as per the requirements and costings for your project.

5

Build:

Our workshop team build the kitchen in our workshop ready for delivery to site. Any damages on supply already resolved.

3

Approve:

Once designs and prices are approved, we will refine the plans, discuss terms of your project and sign contracts.

6

Install:

The fitter and kitchen arrive on site on the agreed delivery date, ready for dry fit installation. Sign off occurs once complete

Warranty and Service

As part of our client-centric service you will enjoy a two year maintenance period from completion of kitchen.

Products

We pride ourselves in the quality of product that we supply. Our made to order cabinets have fewer drill holes and are glue and dowelled for extra durability. They are also available in many finishes to match the selected doors.

We have a beautiful selection of stock doors available in different styles and finishes to give an endless range of possibilities. The broad assortment of door options guarantees us the ability to create an individually tailored kitchen for even the most unusual of spaces.
